

Masajul cu pietre vulcanice Volcanic rocks massage

masajul cu roci vulcanice (pietre calde) este cel mai in voga tip de masaj ce se practica in saloanele de masaj, centre de infrumusetare si centre SPA din intreaga lume, in special datorita efectelor deosebite ce se obtin prin acest tip de masaj.

Terapia cu roci vulcanice calde se bazeaza pe faptul ca pe corpul uman exista anumite canale energetice numite meridiane si a unor centri energetici numiti "chakra" - cele 7 chakra principale se gasesc pe linia mediana a corpului, de-a lungul coloanei vertebrale si sunt conectate cu anumite organe si functii ale corpului.

The hot stones massage is the most fashionable type of massage that is practiced in massage salons, beauty and SPA centres from around the world, mainly due to the special effects that are obtained with this type of massage.

Therapy with volcanic rocks is based on the fact that within the human body there are some energetic channels called meridians and energy centres called "chakras" - the 7 main chakras can be found in the middle of the body, along the spine and they are connected with certain organs and body functions.

Masaj facial Facial massage

Masajul facial este un tratament care ajuta la mentinerea sanatatii si frumusetii pielii, dar si la incetinirea procesului de imbatranire. Alaturi de beneficiile oferite pielii, masajul facial ajuta la combaterea stresului, a congestiei sinusurilor, durerilor de cap si migrenelor.

Sedintele regulate de masaj facial sunt recomandate pentru fermitatea si stralucirea pielii, minimizarea liniilor fine si a ridurilor, dar si pentru hidratare si eliberarea tensiunii.

Facial massage is a treatment that helps maintain skin health and beauty but it also slows down the ageing process. Besides skin benefits, facial massage helps combat stress, sinus congestion, headaches and migraines.

Regular sessions are recommended for facial skin firmness and brightness, to minimise fine lines and wrinkles and also for skin hydration and tension release.

Masaj reflexogen Reflexogene massage

Reflexoterapia are drept scop reechilibrarea energiei vitale a organismului. Reflexoterapia este o stiinta practicata cu mii de ani in urma de catre popoarele egiptene, civilizatii maiase ori incase.

Un mijloc de relaxare al acestuia il constituie masajul reflexogen al piciorului. Efectul acestui tratament este o senzatie de lejeritate si de relaxare.

Se foloseste pentru: inlaturarea tensiunilor si a stresului, imbunatatirea circulatiei sanguine si a celei limfatice, recuoerarea in cazul afectiunii anumitor organe, ca terapie alternativa sau complementare cu terapia clasica si deblocarea fluxurilor nervoase.

Reflexotherapy aims to rebalance the vital energy of the body. Reflexology is a science practiced thousands of years ago by Egyptian peoples, mayans or inka.

A mean of relaxing it is the reflexogenic massage of the foot. The effect of this treatment is a feeling of ease and relaxation.

It is used to: relieve tensions and stress, improve blood and lymph circulation, recovery in the case of certain organ diseases as alternative or complementary therapy with classical therapy and unblocking nerve fluxes.

Masaj anticelulitic Cellulite massage

Masajul anticelulitic are rolul de a stimula circulatia sangvina si limfatica locala, activand metabolismul pielii si de a indeparta depunerile adipoase.

De asemenea, duce la eliminarea toxinelor din tesuturi, redand pielii elasticitatea.

Trebuie stiut faptul ca masajul anticelulitic este eficient in masura in care gradul de profunzime si intensitate terapeutica este atins.

Cellulite massage is designed to stimulate local blood lymph circulation, activating skin metabolism and removing fat deposits.

It also helps eliminate toxins from the tissues and restore skin elasticity.

One should know that celulite massage is effective to the extent that the depth and intensity required is achieved.
